EDUCATION

J.C Bose University Of Science And Technology, YMCA — Faridabad, Haryana, INDIA
B.Tech **Computer Science** — *Oct. 2022 – Jul. 2026*

Senior Shree Ram Model School, Sec- 21 A — Faridabad, Haryana, INDIA
*XII : percentage: **92%*** — *Jun. 2022*

ACHIEVEMENT

Codechef : 963 Global rank on codechef starter132(div3)
College Competition: Achieved 2nd rank and Earned Coding Knight Badge for best website creation for club
Martial Arts: Awarded multiple medals in martial arts competitions

Professional EXPERIENCE

TDP Vista *Full Stack Developer* — Remote | *Jul. 2023 – Sep. 2023*
Developed and maintained web applications: TechBytes – Daily Tech related stuffs, Chit Chats – Fully Optimized Real Time Chat Platform, MovieTime – free movie streaming service

- Applied advanced backend operations for smooth application functioning.
- Worked on optimizations for better user experience.
- Created visually appealing user interfaces for enhanced user experience.

Alliedge Technologies *Frontend Developer* — Remote | *Aug. 2023 – Sep. 2023*

- Revamped the product's web pages, providing it with a contemporary aesthetic and an enhanced user interface for a more modern appeal.
- Orchestrated the integration of Stripe using MongoDB & Node.js, into the product's functionality, establishing an *optimized payment gateway* and initiating a consistent revenue Stream.

PROJECTS

XShare *(Real Time Document Sharing)* | Next.js, Webrtc, Socket.io, React.js, Typescript | Code

- Built a secure, end-to-end encrypted P2P file sharing application using WebRTC for direct peer connections, ensuring privacy and data integrity.
- Implemented robust file transfer protocols to handle efficient data exchange between peers, optimizing transfer speed and reliability

TechBytes *(Daily Tech Stuffs)* | React.js, Redux, Node.js, MongoDB, Bootstrap | Link | Code

- Implemented functionalities like comments, likes, following , creating posts, searching, authentication, animations, and category blogs.
- cloud functionalities like cloud image uploading using *cloudinary*

Streamo *(**Free** Streaming Site)* | MERN, Tanstack Query, TailwindCSS | Link | Code

- Option of multiple servers to see the movies and series for free , stunning and catchy UI
- Implemented functionalities add to watchlists, caching movies/series using Tanstack query (react-query)

Bargain Hub *(Tracked Products Data)* | Next.js, Typescript, MySQL, Django| Code

- Comparsion graphs, charts of the prices, Price Drop Alerts through emails, Product Tour and Recommendations based on rankings, Product's actual prices comparisons with nearby stores and on online platform like flipkacart and moree..

Chit-Chats *(Real Time chat platform)* |React.js, Socket.io, MongoDB, Node.js| Link | Code

- Implemented functionalities of private/group chats, advanced backend operations, notification system, performance optimization, document sharing and many more.

NPM Explorer *(Chrome Extension)* |React.js, Webpack | Code

- NPM Explorer is a Chrome extension designed to simplify the process of searching for NPM packages by providing essential information such as weekly downloads, description, and links to demos and GitHub repos

SKILLS & TECH STACK

JavaScript | TypeScript | React.js | Next.js | Prisma | Redux Toolkit | Tailwind CSS | MUI | Node.js | Webrtc | Socket.io | Express.js |MongoDB | Tanstack Query | Git | MySQL | FireBase | Socket.io | Postman | Python | Django | Github | Clerk | Vercel | OpenAI | Chrome-Extension Development
